

HELI MAX® GROUTED PILES

NEW DRILLED DISPLACEMENT PILE

APPLICATIONS

- Heavy commercial foundations
- Infrastructure & utilities
- Waterfront & wet conditions
- High-capacity loadings

KEY FEATURES

High Load Capacity

Handles 300+ tons with outstanding compressive and tensile strength

Continuous Grout Column

Pressurized tremie method seals soil and prevents seepage - great for high water tables

Reduced Equipment

Installs with just an excavator - no cranes, no extra crews

Safer Installations

Low vibration, no spoils, and fewer overhead hazards

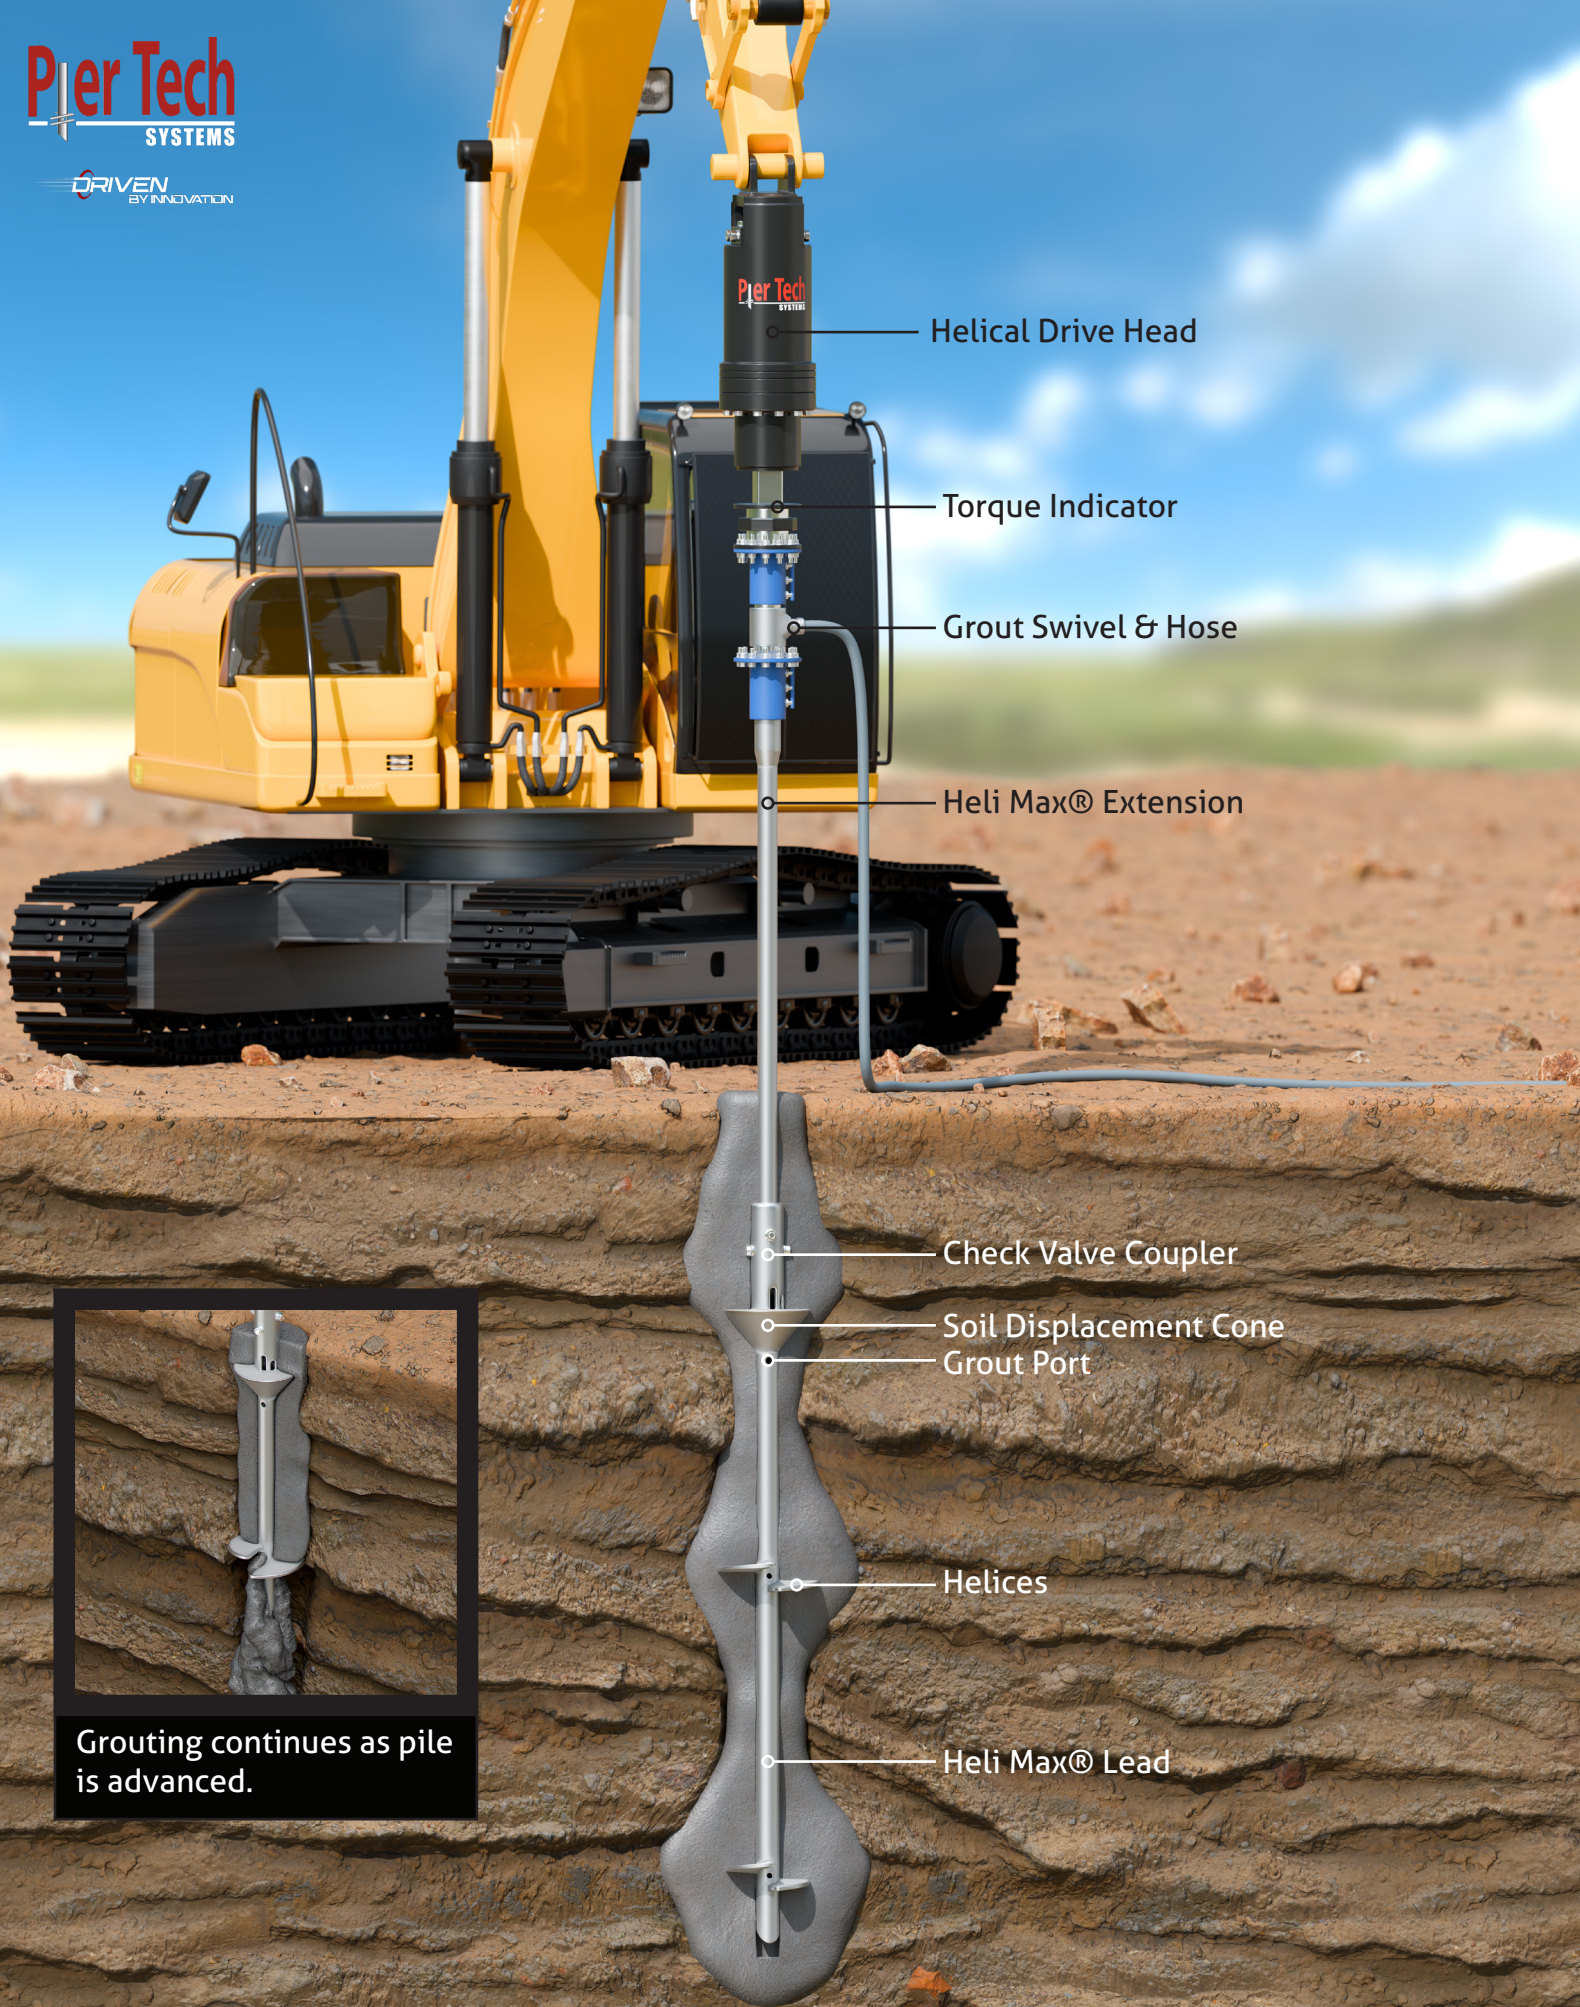

Adaptable & Accessible

Pile length adjusts easily; installs in limited access and low-clearance conditions

Lower Cost per Ton

Delivers more capacity at less cost

U.S. Patent No. 10,934,678. Manufactured under license.

Grouting continues as pile is advanced.
