

THE FUTURE OF DRILLING IS HERE

The future of foundation installation is here. The PierTech™ HALO is a rugged, field-ready alignment system integrated directly into the hood ring of your drive head. No screens, no distractions—just instant visual feedback right where you need it.

Using a band of LED lights, HALO guides operators to perfect plumb. When the lights glow solid green, you're on target. If the drive shifts, a sequence of red and green indicators makes it simple to correct—keeping your piles straight, safe, and precise.

FEATURES

- Integrated LED Ring: Recessed into the hood for added protection.
- Daylight-Visible: Bright enough to see clearly, even in full sun.
- Pinpoint Accuracy: Within $\pm 0.25^\circ$ of plumb.
- Eyes on the Job: No need for in-cab displays—alignment is visible where you're working.
- Flexible Options: Multiple cable lengths, wiring setups, and power solutions available.
- Cord-Free Capability: Optional rechargeable battery means no wiring back to the cab.
- Angle Inclination Mode: Perfect for angled installations

WHY YOU NEED HALO

- Ensure that your piers are plumb
- Never take your eyes off the job
- No setup with the battery option
